Strategic Sourcing for Successful Supplier Relationships

Strategic sourcing seeks to embrace suppliers as partners, as though they are upstream work centers within our company. The goal is long-term relationships founded on mutual compatibility of interests, competencies and trust. Traditional habits of beating up vendors on price and dictating terms are replaced with win-win partnerships that serve to strengthen the supply chain. This view recognizes that supply chains are only as strong as their weakest link, and it is in all parties' best interest to strengthen each link.
